VOL. 1, NO. 3 FALL–WINTER 1975

SELDEN REPORT IS COMPLETED

RECOMMENDS NAME CHANGE AS FIRST STEP TOWARD REGIONALIZATION

The long-awaited final report of the Health Sciences Research Project is now complete and in the hands of the New England Board of Higher Education, for whom the report was prepared, as well as those of HEW Health Resources Administration officials, who funded the study. MCO President William Baldwin has placed a pre-publication copy of the report (entitled *Optometric, Osteopathic, Podiatric Education in New England* and authored by William K. Selden) in the MCO library for perusal by all interested members of the MCO and optometric community.

As most readers of this newsletter already know, the report's short-term recommendation is that a regional education program in optometry be developed, with the governance, financing — and benefits — of such a program to be shared by all six New England states. For the long term, it recommends the establishment of an academic health center which would provide, initially, education for the professions of optometry, osteopathy, and podiatry. (Veterinary medicine also might be included in such an institution; a recent NEBHE report on the training of veterinarians recommended that the education of these professionals also would benefit from an interdisciplinary environment.)

The Selden report recommends that MCO trustees and officers take certain actions to facilitate these goals; some of these have already been taken and others are slated for consideration in the immediate future.

At its August 20 meeting, the MCO Board of Trustees unanimously passed a resolution reacting positively to both the short- and long-term recommendations contained in the Selden report. The resolution authorizes and directs "any and all . . . officers, employees, and agents of the College . . . to explore all reasonable ways in which a mutually beneficial partnership between the institution and the New England states may be formed."

At that same meeting, MCO trustees agreed to recommend to the Incorporators that the name of the Massachusetts College of Optometry be officially changed to the New England College of Optometry "in order to more accurately reflect the institution's constituency." The name change, if acted upon favorably by the Incorporators at their October 22 meeting, will be effective July 1, 1976, and will pave the way for other regionalization efforts.

The trustees also revised the MCO charter and by-laws to permit appointment, at some future date, of a designated number of trustees by governors or other officials of each of the six states.

Accomplishment of the short-range objective, a regional education program in optometry, and the long-range goal, an integrated health center, will require the participation of the legislative and executive branches of all six New England states. The College's immediate efforts will be directed toward receiving capitation support from the states. Under the capitation system, which is the approach followed with the state of Connecticut during the 1974-75 academic year, each state's support to the College would be based on the number of student places reserved for qualified students from that state. According to Dr. Baldwin, this first step toward regionalization, as well as any future ones which might be taken, represents substantial, but not widely understood, advantages to the New England states and their residents. "It will be necessary," says Dr. Baldwin, "for us to make a case we probably ought to have made more forcefully some time ago: that the increasing trend among public colleges of optometry to admit only in-state students and among private institutions to contract with individual states for class spaces, combined with the increased competition for admission to schools of optometry, make it apparent that MCO may shortly become the only school to which the region's aspiring optometric students have any hope of gaining admission."

The report also recommends that the College pursue the possibility of affiliating with a local private university, in an attempt to lay the groundwork for future regionalization efforts. Dr. Baldwin and the New England Board of Higher Education are cooperatively exploring the relative merits of affiliation with several institutions of higher education. One of the obvious criteria for selection of such an institution will be the number of areas in which cooperation between MCO and the university would be mutually beneficial.

The report's long-range recommendation, the incorporation of MCO into an as-yet-non-existent regional academic health center, will require considerable time to plan and implement. A planning study — which would, among other things, analyze personnel, space, facility, equipment, and cost requirements — is the first step in the establishment of such an integrated health facility.

According to Dr. Baldwin: "I hope that a contract to conduct a planning study for a health center can be negotiated in the near future. But realistically I know that, even should such a study recommend positive and immediate action, the establishment of an integrated health center is as much as a decade in the future. In the interim, the various efforts we are making to regionalize the College's optometric education program are very important. We feel confident that these efforts will allow the College to continue to fulfill its role of providing the New England region with the best possible optometric eye care. The real issue involved in regionalizing our program, and thereby broadening our base of financial support and our services to the New England region, is not the life or death of the College, but the ability to provide quality education and training, or the inability to do so."

Participation in the various regionalization efforts by MCO alumni and other members of the New England optometric community is vital to the plan's success. Dr. Baldwin has expressed his eagerness to entertain recommendations on any and all of the various actions under consideration. The help of alumni and others in spreading the word about the regionalization plan and in encouraging legislative support for a planning study and for capitation support is earnestly solicited.

The October 22 meetings of both the Board of Trustees and the Incorporators are open to any interested parties. They will begin at 5 p.m. at the Marriott Motel in Newton, just prior to the kickoff dinner for the Foster Namias Building Fund.

Visits to the MCO library to examine the Selden report, which promises to be a very important document in MCO's future, are also invited.

OFFICIAL KICKOFF DINNER FOR FOSTER NAMIAS BUILDING FUND TO BE HELD OCTOBER 22

The Foster Namias Building Fund got under way rather quietly July 1, and a number of generous workers spent the late summer lubricating various bearings and linkages in preparation for a shift to high gear. That shift will occur at the fund raising campaign's official kickoff dinner on Wednesday, October 22.

The dinner will be at the Marriott Motor Hotel in Newton, immediately following the annual meeting of the Board of Trustees and the Incorporators. (Cocktails will be at 6 and dinner at 7 p.m.)

Invited guests will include donors who have pledged $200 or more per year for three years to the Namias Fund; donors who have given $1,000 or more to either phase of the Building Fund (as you know, the Foster Namias Building Fund represents Phase II of a comprehensive effort which began in 1971); campaign workers; trustees; and members of the Corporation.

Highlighting the dinner will be reports of the Namias Fund's progress to date by Dr. Glen Gulezian (class of 1965), the Fund's chairman, and by Mr. Joseph Jefferson, MCO Vice President.

According to Dr. Gulezian, he and his able crew of volunteers are attempting to raise $300,000 by June 1978 (or $100,000 per year for three years). The purpose of the drive, of course, is to pay off the mortgage on the Beacon Street campus in order to free operating funds for use in quality education programs.

The Foster Namias Building Fund Committee consists of thirteen members: Dr. Gulezian, Richard W. Baker, O.D., Arlington, Mass. ('32); John Asarkof, O.D., Boston ('32); William R. Baldwin, O.D., MCO President; Henry Boroyan, O.D., Chelmsford, Mass. ('69); Lester Brackley, O.D., Quincy, Mass. ('68); Thomas Callahan, O.D., South Hadley, Mass. ('59); Irving Fradkin, O.D., Fall River, Mass. ('43); Joseph Jefferson, MCO Vice President; Hyman R. Kamens, O.D., MCO Dean of Administration ('47); Frank Kožol, O.D., MCO Registrar and Associate Professor ('48); Paul Montminy, O.D., Lowell, Mass. ('65); and Samuel Wasserman, O.D., Randolph, Mass. ('42).

Many alumni have been extremely generous in volunteering their time to serve as campaign workers, and the fund raising effort in certain areas of New England is now spearheaded by a local alumnus. These people include George Bournakel, O.D., Lewiston, Maine ('61), Roland DeCesare, O.D., Providence, R.I. ('44); Joseph R. Donatelle, O.D., Springfield, Mass. ('61); Robert Grossman, O.D., Northampton, Mass. ('64); David Higgins, O.D., Kittery, Maine ('74); James Michaud, O.D. Gardiner,, Maine ('64); Stanley Miller, O.D., Weston, Mass. ('69); William Ouellette, O.D., Brunswick, Maine ('75); Richard A. Peppe, O.D., Great Barrington, Mass. (a graduate of Southern College); and David Smith, O.D., Portland, Maine ('62).

If this listing excludes *your* hometown, why not volunteer your services? A call to Glen Gulezian (373-1341) or Joe Jefferson (261-3430) will place you on the official roster of campaign workers immediately.

EVENING AT AQUARIUM TO EQUIP VISION CLINIC FOR COTTING SCHOOL

Watch dolphins cavort. See scuba divers feed yard-long fish. Mingle with diving celebrities (no pun intended). Dance on a boat, And help equip a vision clinic for children at the Cotting School for Handicapped Children.

MCO has just completed its first year of affiliation with the Cotting School. For the past year, Cotting has been running a shuttle service to the College and the Pediatric Clinic to provide its students with evaluation, prescription, and treatment services. Now, the School is attempting to raise funds to build and equip its own clinic in order to provide still better vision service to its students. MCO faculty and student clinicians will administer the clinic.

The Scuba Divers of New England have volunteered to try to raise $30,000 for this purpose. They are calling their venture, which got under way earlier this summer, Seamark '75. Seamark '75 will culminate in a social evening at the New England Aquarium at 7:30 p.m., Saturday, October 11. Divers from all over New England, as well as some from abroad — and, it is hoped, a sizable representation from the optometric community — will gather at the Aquarium that evening. There will be a continuous exhibition of divers in the main four-level tank feeding the animals, as well as a special 9 p.m. performance by some talented dolphins. A half dozen cocktail bars will be placed throughout the Aquarium, and there will be continuous film exhibitions in a number of nooks and crannies.

Divers are also selling raffle tickets for trips to Honduras and Tobago, a Rolex underwater watch, a UD System (*they* know what it means), a depth finder, and many other prizes.

Contribution for the evening is $10 per person. Raffle tickets are $1 each, or $5 for a book of six. Please call Ms. Joanne Cardoza (261-3430, extension 64) for reservations and tickets.

Dr. Jerome Rosner, who will supervise the new clinic, sees the arrangement as having important interdisciplinary ramifications: "The new facility," he says, "will allow two teams of professionals, optometrists and educators, to work together on solving the educational problems of children with special needs — in this case children who are, for the most part, orthopedically handicapped," Very early in his career, Dr. Rosner was a consultant to the Home for Crippled Children in Pittsburgh, Pa.

The Cotting School, for those unfamiliar with it, is a privately supported, tuition free, non-sectarian day school for physically or medically handicapped, mentally normal boys and girls from the first grade through high school. It offers courses preparatory for college and other advanced schools, as well as business education and vocational training in electronics, woodworking, cabinet work, book-binding, all aspects of graphic arts (including computerized composition), cooking, sewing, and laboratory technique. The School is supported entirely by legacies and contributions.

Your presence at the Aquarium on October 11 will benefit both MCO and Cotting programs. Ancillary benefits will be (a) a good time, (b) some addition to your store of knowledge about sealife, (c) a possible appearance on television (you could always throw yourself in front of one of the cameras); and (d) who knows, a trip to Honduras or Tobago — or *even* a brand new UD System.

SOME SPACES STILL AVAILABLE IN CONTACT LENSE PROGRAM

A few class spaces are still available in a special three-part continuing education program designed to improve optometrists' skills in contact lens fitting.

The program, "Practical Contact Lenses for the Optometrist," will involve lecture material, use of this material in a laboratory setting, and application of both lecture and laboratory knowledge to patient care in a clinical setting. The three phases of the program are designed to allow the optometrist to use the information gained immediately in his own practice.

The three courses comprising the program are General Contact Lens Fitting, Specialized Contact Lens Fitting, and Clinical Contact Lens Fitting. Each of the first two courses will include both lecture presentations and laboratory opportunities to apply information covered in the lectures. (Participants will, for instance, practice fitting each other with lenses.)

An evaluation will be mailed to all registrants to determine whether they should be placed in the General or the Specialized class. This procedure is designed to insure placement of participants in the course most suited to their needs

and to guarantee some homogeneity within classes. Satisfactory completion of one phase of the program qualifies the practitioner for the next phase. While registrants may exempt the General Contact Lens course by the qualifying exam, all participants must successfully complete the Specialized Contact Lens Fitting course before enrolling in the Clinical Contact Lens Fitting course.

Participants in the third course will be given extensive opportunity to apply their new knowledge directly to patient care.

The General Contact Lens Course begins January 7, 1976, and runs through March 10. Tuition for the 45-hour course is $270.

The Specialized Contact Lens Fitting course will run from March 24 through June 2, 1976. Tuition will be $270 for the 45 hours.

The first session of the Clinical Contact Lens Fitting course will run from July 5 through September 20, 1976; the second, from September 27 through December 13, 1976. Tuition for the 36-hour Clinical Contact Lens Fitting course is $180.

For further information on registration, tuition, and schedules, contact Sidney Wittenberg, O.D., Director, Division of Continuing Education.

TWO NEW TRUSTEES NAMED TO BOARD

The MCO Board of Trustees has gained two new members in the past year. Many of you have already met them, but we have been somewhat delinquent in officially telling you of their presence.

J. John Fox, who retired in 1973 from the position of Judge of Probate Court for Norfolk County, was appointed to the Board in January. Judge Fox, well known for his co-sponsorship of the Bartley-Fox Gun Control Bill, is extremely active in civic affairs. He is Director of the Massachusetts Catholic Conference and a member of its executive committee; President, Advisory Council, Mental Health Research Corporation, Harvard University; member, Mayor's Committee on University and Urban Relations; trustee, Museum of Science; Director, Maimonides School; Chairman, Board of Overseers for Governmental Relations, Brandeis University; Director, Massachusetts Halfway Houses; Director, Catholic Charitable Bureau of Boston; Director, Massachusetts Association for Retarded Children; member, Advisory Committee, The American Federation of Arts, Provincetown; fellow and member, Executive Committee, Brandeis University; Director, Charles River Park Synagogue; and Director, West End House, Inc.

He served as Chief Secretary to the late Governor Paul A. Dever from 1948 to 1952, as Judge of the Municipal Court of the City of Boston from 1952 to 1960, and he is a former trustee of the University of Massachusetts.

JOHN R. WILLIAMS

John R. Williams, Vice President for Marketing of Bausch & Lomb's SOFLENS Division, has been elected to a three-year term on the Board, effective January 1976. Mr. Williams, 35, holds an A.B. from Dartmouth College and an M.B.A. from the University of Rochester.

He joined U.S. Steel as a commercial sales trainee in the summer of 1962 and subsequently functioned in various training and sales positions in New York, Pittsburgh, and Philadelphia.

Three years later, he joined Bausch & Lomb as an instrument sales representative with responsibilities throughout the West Coast. He was brought to the home office in Rochester in 1967 to begin a special assignment on the SOFLENS Contact Lens. Since 1967, he has been promoted through various positions within the SOFLENS Division. He functioned as a technical representative in the original development work of the lens, program coordinator for the field investigation, Sales Coordinator, Product Manager, and Marketing Manager. He was promoted to Director of Marketing in January 1972, and then to Vice President for Marketing, SOFLENS Division, in January 1973.

Mr. Williams is Vice President of the Corrective Eye Care Foundation and a member of the Board of Directors of Hillside Children's Home, SOFLENS Insurance Company, Rochester Sales Executives Club, and Rochester Eye & Human Parts Bank, Inc.

OTHER NEW FACES

Frederick Bloom, O.D., a 1975 graduate of MCO, joined the faculty in September as Clinical Instructor.

Richard Calderon, O.D., a 1975 MCO graduate, has accepted an appointment as an Adjunct Clinical Instructor. Dr. Calderon is on the staff of the William P. Beetham Eye Research Unit, Joslin Diabetic Foundation.

Richard Houghton, O.D., also a 1975 MCO graduate, accepted an appointment as Clinical Instructor September 1.

Richard C. Laudon, O.D., a 1975 MCO graduate and the holder of a B.S. from the University of Bridgeport, also become a Clinical Instructor in September. Dr. Laudon was the 1975 recipient of the Robert Morgan Community Service Award, presented annually to the graduating senior who has contributed most to the development of community health care.

Robert Perlin, O.D., has been named an Associate Clinical Professor, and will serve as a clinical preceptor for MCO students assigned to the Veterans Administration's Eastern Blind Rehabilitation Center in West Haven, Connecticut. His appointment will be effective January 1.

Harvey D. Rappoport, O.D., who received his O.D. from MCO in 1975 and his B.A. in biology from Boston University in 1971 *(magna cum laude)* was named Clinical Instructor, effective July 1. Dr. Rappoport's student career at MCO included serving as president of his class for two years, in numerous other offices, and as a member of the Year Book Committee.

Donald J. Robinson, O.D., a 1950 MCO graduate, was named Associate Clinical Professor in September. Dr. Robinson retired from the Navy in July with the rank of Commander. His last duty assignment was as Senior Optometrist at the Naval Regional Medical Clinic in Washington, D.C. He was in private practice in Middleboro, Maine, for three years before joining the Navy.

Jerome Rosner, O.D., a graduate of the Pennsylvania College of Optometry, became Professor of Optometry, Coordinator of the Pediatric Optometry Track, and Director of Specialty Clinics this summer. The author of a recent book published by Walker Publishing Co. (N.Y.), *Helping Children Overcome Learning Difficulties.* Dr. Rosner was most recently a Research Associate in the University of Pittsburgh's Learning Research and Development Center and Associate Professor of Read- and Lanugage Arts in that institution's School of Education.

Samuel W. Schlosberg, O.D., was named an Adjunct Associate Clinical Professor at MCO, effective September 1. He will serve as a clinical preceptor for optometric rehabilitative residents assigned to the Veterans Administration's Outpatient Clinic in downtown Boston. He has been Staff Optometrist at that facility since 1947.

John S. Thornton, M.D., was named an Adjunct Associate Clinical Professor in September. He will be a clinical preceptor at the V.A. Outpatient Clinic, where he has served for some time. A retired Army officer, Dr. Thornton has also been Chief of Eye, Ear, Nose and Throat Service at V.A. hospitals in North Little Rock, Arkansas; Lyons, New Jersey; and West Roxbury, Massachusetts. Dr. Thornton's medical degree is from the University of Lausanne in Switzerland.

NEW DOINGS

Paul Pease, O.D., Assistant Professor of Physiological Optics and Coordinator, Physiological Optics Track, will discuss "The Anatomy and Physiology of the Eye" at a Symposium on Diseases of the Eye. The symposium, sponsored by the Massachusetts College of Pharmacy, will be held Saturday, October 18, on the MCP campus.

Jerome Rosner, O.D., Professor of Optometry, Coordinator of the Pediatric Optometry Track, and Director of Specialty Clinics, is the author of a new chapter in a new book, *Domain-Referenced Testing in Special Education,* pub-

(continued on page 4)

JEROME ROSNER, O.D.

SIDNEY WITTENBERG, O.D.

Dr. Rosner will speak on "The Optometrist's Role in Learning Disabilities" at the October 1 meeting of the Massachusetts Society of Optometrists in Framingham.

A newly appointed member of the Advisory Board of the Massachusetts Association for Children with Learning Disabilities, Inc., *Dr. Rosner* will be the keynote speaker at the Mass. ACLD's ninth annual fall conference program on "Stop the World, We Want to Get On," October 23-24, at the Sheraton Inn in Sturbridge. He is scheduled to deliver two addresses: "Children with Learning Disabilities CAN Learn but They Surely Have to be Taught" and "The Parent's Role – Key to Success."

William Vaughan, Assistant Professor of Optics, is associate editor of a new *Handbook of Optical Data,* to be published soon by McGraw-Hill under the auspices of the Optical Society of America.

Dr. Sidney Wittenberg, O.D., Director, Division of Continuing Education and Applied Research Laboratories, has been invited by the United States Air Force School of Aerospace Medicine to lecture to the 1975 USAF Optometry Seminar on "Automated Refractors – Impact on Military Optometry." The meeting will be held at Brooks Air Force Base in San Antonio, Texas, September 30.

Dr. Wittenberg will spend two weeks in October in Milan, Italy, where he has been invited by Federottica (an organization of optometrists and opticians) to lecture to a group of Italian optometrists. His thirty hours of lecture material will cover "The Complete Optometric Examination" and "The Optometric Care of Children."

NEW DOINGS (continued from page 3)
lished by the University of Minnesota's Leadership Training Institute/Special Education and distributed by the Council for Exceptional Children in Reston, Virginia. The title of Dr. Rosner's contribution is "Testing for Teaching in an Adaptive Educational Environment."

ALUMNI NOTES

Mark Engleman (1975), now in private practice in Flint, Michigan, won the Horton Smith Memorial Trophy in a tournament at the Detroit Golf Club this summer, just two weeks after graduating from MCO. One of 66 competitors, Dr. Engleman one-putted six of the first seven holes. He finished the 36-hole course with a score of 142, two strokes over par.

Terry M. Noel (1974), a private practitioner in Allentown, Pennsylvania, has been named Instructor in Clinical Optometry at the Pennsylvania College of Optometry. She holds a B.S. in biomedical engineering from Boston University.

Harvey Rappoport (1975), a Clinical Instructor at MCO, and his wife, Lorraine are the parents of a new son, Joshua Michael, born August 2.

Arthur N. Rosen (1975) has accepted a position with the Harvard Community Health Plan.

Note: Can anyone best the U.S. Post Office and locate Michael O'Brien and William H. Feinstein? Our last recorded addresses for them were in Williamstown, Maryland, and Alexandria, Virginia, respectively.

A REMINDER TO ALUMNI

Alumni Association dues for 1975 must be paid by December 31. According to Dr. Morris Berman, Secretary of the Association, the changeover in fiscal years from a March 1 commencement date to a January 1 commencement date left some alumni understandably perplexed about which year they were paying dues for. Dues for 1976 will be payable soon, so if you haven't yet sent in your check for 1975, you have just a few months left.

Dr. Berman reports that the Association roster includes eight new members, including one from the class of 1931, who have never paid dues before.

CALENDAR OF EVENTS

SATURDAY, OCTOBER 11: Benefit for Cotting School's Vision Clinic. Sponsor: Scuba Divers of New England. Time: 7:30 p.m. Place: New England Aquarium. Contribution: $10 per person.

WEDNESDAY, OCTOBER 22: Meeting, Board of Trustees and Incorporators. Time: 5 p.m. Place: Marriott Motor Hotel, Newton.

WEDNESDAY, OCTOBER 22: Kick-off dinner, Foster Namias Building Fund. Time: 6 p.m. cocktails; 7 p.m., dinner. Place: Marriott Motor Hotel, Newton.

SUNDAY, NOVEMBER 2: Dinner production of *Sweet Charity,* sponsored by the Auxiliary to the Massachusetts Society of Optometry to benefit general Auxiliary projects, including MCO's Low Vision Clinic. Time: 6 p.m., dinner; 7:30 p.m., performance. Place: Chateau de Ville, Framingham. For reservations and tickets, call Mrs. Florence Blanchard at 944-2115.

SUNDAY, NOVEMBER 3: Continuing Education course. Title: Practical Aspects of Lens Use. Instructors: Bernard Grolman, O.D., Chief Specialist, Ophthalmic Research, American Optical Corporation; Thomas B. Hotopp or Ron Krause, Optical Engineering Department, Technical Products Division, Corning Glassworks; George A. Chase, Chairman of the Board, Regal Optical Company; and Frank Kozol, O.D., Associate Professor, MCO. Time: 9:30 a.m. to 4:30 p.m. Place: Holiday Inn, White River Junction, Vermont. Tuition: $60 (free to alumni donors pledging $200 per year to the Foster Namias Building Fund).

WEDNESDAY, NOVEMBER 5: Continuing Education course. Title: What Every Optometrist Should Know About Glaucoma. Instructors: James Patten, M.D., Chief Corneal Fellow, Massachusetts Eye and Ear Infirmary, and Assistant Clinical Professor of Ophthalmology, MCO, and Boyd Eskridge, O.D., Ph.D., School of Optometry, University of Alabama in Birmingham Medical Center. Time: 9:30 a.m. to 7 p.m. Place: MCO campus. Tuition: $50 (free to alumni donors pledging $200 per year to the Foster Namias Building Fund.

WEDNESDAY, NOVEMBER 12: Continuing Education Course. Title: Practical Aspects of Lens Use. Instructors: See November 2 listing for same course. Time: 9:30 a.m. to 4:30 p.m. Place: Yale Motor Inn, Wallingford, Connecticut. Tuition: See November 2 listing.

SUNDAY, NOVEMBER 23, and MONDAY, NOVEMBER 24: Continuing Education Course. Title: New Knowledge in Vision and its Implications for Optometric Care. Instructors: Ann M. Graybiel, Ph.D., Assistant Professor of Psychology, Massachusetts Institute of Technology,; David H. Hubel, M.D., George Packer Berry Professor of Neurobiology, Harvard Medical School; Torsten N. Weisel, M.D., Department of Neurobiology, Harvard Medical School; Michael P. Stryker, Ph.D., Research Fellow in Neurobiology, Harvard Medical School; Donald E. Mitchell, Ph.D., Professor of Psychology, Dalhousie University, Nova Scotia; Richard M. Held, Ph.D., Professor of Experimental and Developmental Psychology, M.I.T.; John Carter, O.D., Ph.D., Academic Dean, MCO; Indra Mohindra, O.D., Professor of Pediatric Optometry, University of Alabama in Birmingham Medical Center; and Jerome Rosner, O.D., Professor of Optometry, Coordinator of the Pediatric Optometry Track, and Director of Specialty Clinics, MCO.

WEDNESDAY, DECEMBER 10. Meeting, Executive Committee, Board of Trustees. Time: 12:15 p.m. Place: Office of the President, MCO.

FRIDAY, DECEMBER 12: Alumni Holiday Meeting. Time: 6:30 p.m. Place: Colonial Country Club, Lynnfield.

WEDNESDAY, DECEMBER 17: Meeting, Board of Trustees. Time: 12:15 p.m. Place: Harvard Club.
